

Save the Date! • Sept. 15-19, 2019

2019 Water & Natural Resources Tour

Our tour will explore the Missouri River basin in southern Montana and north-west Wyoming, focusing on the Yellowstone River and National Park area, the Shoshone project featuring Buffalo Bill Dam and reservoir, and the headwaters of the Missouri River. Other stops on the

tour will examine surface and groundwater issues, municipal water supplies, Musselshell River flooding, and other natural resources issues.

Tour participants will gather for check-in at a hotel (TBD) in Billings, MT on the evening of Sunday, Sept. 15. Individuals will be responsible for their own airfare/travel to and from Billings. The tour will return to the hotel on the evening of Thursday, Sept. 19.

Check our websites for more detailed information as the date approaches:
